

DataMonk

Get It Done

Unlock the Power of Your Data with
Intelligence & Precision!

We specialize in database management, large-scale data processing, AI-driven analytics, and machine learning, empowering businesses with actionable insights and scalable solutions.

THE VISIONARIES BEHIND DATAMONK

Rahul Gupta
CO-Founder & CEO

I graduated from IIT Kanpur in 2012 and spent four years in Silicon Valley working at a self-driving car company. During this time, I contributed to innovations in autonomous technology and hold patents in the field. Later, I worked at PAR Tech, where I continued working on cutting-edge solutions. My experience spans deep tech, software engineering, and building scalable systems. I co-founded DataMonk to build a world-class team of data and AI professionals.

Divesh Gupta
CO-Founder

Divesh is a seasoned professional with extensive experience in risk and analytics, having worked at major financial institutions, including JPMorgan Chase, Bank of America, and Wells Fargo. A graduate of IIT Bombay in 2007, he has built a strong career in the financial sector before transitioning to product management at Amazon. Currently based in Seattle, Divesh is leveraging his expertise in sales at DataMonk, bringing his deep industry knowledge to drive business growth.

Sai Arava
Advisor

Sai is a seasoned machine learning leader with over 11 years of experience at Adobe, currently serving as a Senior Machine Learning Manager. A graduate of IIT Kanpur in 2012, he has made significant contributions to the field of AI, including authoring a book on Large Language Models published by Springer. As a member of the Forbes Technology Council, Sai actively shares his expertise through thought leadership articles. He is also passionate about mentoring the next generation of ML engineers through Springboard, helping them navigate and excel in the evolving AI landscape.

Driving Growth with Cutting-Edge Technology. 🚀

Data Process Integration

Seamlessly integrate and optimize your data workflows, ensuring smooth data movement, transformation, and accessibility across your organization.

Machine Learning & Generative AI

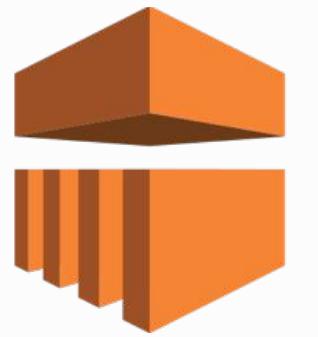

Leverage advanced ML models and generative AI to extract insights, automate processes, and drive intelligent decision-making.

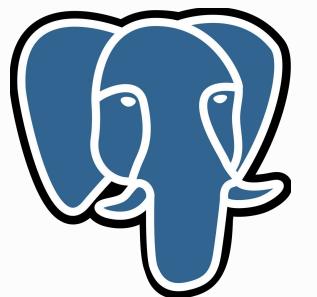

Ruby on Rails Development

Building robust and efficient web applications using Ruby on Rails, ensuring speed, security, and flexibility for your digital solutions.

Flexible & Transparent Pricing for High-Quality Development

Starting at just \$500 per developer

Why Choose DataMonk?

Expert Developers: Get access to professionals with years of experience in AI, ML, web development, and more.

Cost-Effective: High-quality development at an affordable price.

Scalable Teams: Hire as per your project needs and scale up or down anytime.

Flexible Engagement Models: Choose between full-time, part-time, or project-based hiring.
